July 31, 2006

Ross and Julie Lampky
415 6th Avenue
Aberdeen, WA 98520

Dear Mr. and Mrs. Lampky:

Re: Extension and Amendment of Water Right Permit No. S2-28676

We received your letter requesting an extension of the development schedule under Water Right Permit S2-28676 and the statutory extension fee of \$50.00. Under RCW 90.03.320, projects under water right permits must be prosecuted with diligence and completed within the time prescribed by the department. Extensions may be granted upon showing of good cause, having due regard to the good faith effort of the applicant and the public interests affected.

Permit G2-28676 was originally issued to Ode and Lula Satterfield on July 6, 1993 for .02 cubic feet per second and 0.34 acre-feet per year from Summit Lake for single domestic, in-house use. Since that time, the permit has been extended three times, then assigned to you from the Satterfields on April 8, 2004. At that time, you were granted an additional extension through May 1, 2006 to complete construction of this project.

Your letter indicates that the water system, pump house, and diversion are completed and that you have hired an architect and an engineer to assist in completion of your home. You indicate that full use of water is expected within the next 24 months.

It appears that there has been due diligence in the pursuit of development of water under this permit and that good cause is shown for an extension of the completion of construction and proof of appropriation dates. This extension to allow the use of surface water for domestic supply, where no alternative water supply is available, will not be detrimental to the public interest.

However, due to new metering requirements under WAC 173-173, you will be required to measure and record water use annually and to maintain records of your use.

Accordingly, the following provisions will be added to Permit S2-28676 and an Amended Permit will be issued as a condition of this extension approval:

An approved measuring device shall be installed and maintained for each of the sources identified by this water right in accordance with the rule "Requirements for Measuring and Reporting Water Use", Chapter 173-173 WAC.

Water use data shall be recorded annually and maintained by the property owner for a minimum of five years, and shall be promptly submitted to Ecology upon request.

The following information shall be included with each submittal of water use data: owner, contact name if different, mailing address, daytime phone number, WRIA, Permit/Certificate/Claim No., source name, annual quantity used including units, maximum rate of diversion including units, monthly meter readings including units, peak monthly flow including units, purpose of use, fish screen status, and period of use. In the future, Ecology may require additional parameters to be reported or more frequent reporting. Ecology prefers web based data entry, but does accept hard copies. Ecology will provide forms and electronic data entry information. Submit data to: Department of Ecology, SWRO/WR PO Box 47775, Olympia, WA 98504-7775.

Chapter 173-173 WAC describes the requirements for data accuracy, device installation and operation, and information reporting. It also allows a water user to petition Ecology for modifications to some of the requirements. Installation, operation and maintenance requirements are enclosed as a document entitled "Water Measurement Device Installation and Operation Requirements".

Department of Ecology personnel, upon presentation of proper credentials, shall have access at reasonable times, to the records of water use that are kept to meet the above conditions, and to inspect at reasonable times any measuring device used to meet the above conditions.

You are hereby granted an extension of time until May 1, 2008, to complete construction and put the water to full beneficial use under Permit S2-28676.

Please submit the following by May 1, 2008:

- A Completion of Construction and Proof of Appropriation form
- A \$34.00 check payable to the Clallam County Auditor
- A \$50.00 check payable to the Department of Ecology

If you are unable to comply with your new development schedule, you may request an extension prior to May 1, 2008, by submitting a written request and the statutory extension fee along with the following information:

- A showing of good cause for why an additional extension should be granted
- A summary describing the progress made since the last extension was granted
- An estimate of the time needed to complete development and put water to full beneficial use

You have the right to appeal this water right decision to the Pollution Control Hearings Board. Pursuant to chapter 43.21B RCW, your appeal must be filed with the Pollution Control Hearings Board, and served on the Department of Ecology, within thirty (30) days of the date of your receipt of this document.

To appeal this action or decision, your notice of appeal must contain a copy of the Ecology order, action or decision you are appealing.

Your appeal must be filed with:

The Pollution Control Hearings Board
4224 - 6th Avenue SE, Rowe Six, Bldg. 2
P.O. Box 40903
Lacey, Washington 98504-0903

Your appeal must also be served on:

The Department of Ecology
Appeals Coordinator
P.O. Box 47608
Olympia, Washington 98504-7608

In addition, please send a copy of your appeal to:

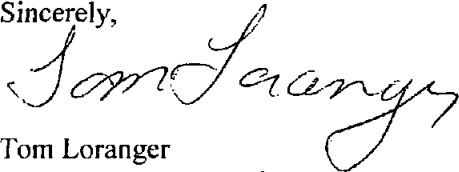

Water Resources Program
Department of Ecology
Southwest Regional Office
PO Box 47775
Olympia, WA 98504-7775

An appeal alone will not stay the effectiveness of this decision. Stay requests must be submitted in accordance with RCW 43.21B.320.

For additional information, please visit the Environmental Hearings Office Website:
<http://www.eho.wa.gov>.

If you have any questions regarding this letter or the conditions on your water right, please call Marie Peter at (360) 407-0279.

Sincerely,

Tom Loranger
Water Resources Section Manager
